Textbook: Entrepreneurial Finance

By: J. Chris Leach and Ronald W. Melicher

(Purchasing the textbook is optional. The textbook is a helpful reference but the key concepts and exam material will be covered in class notes, assignments and lectures.)

<u>Class Notes</u>: Lecture outlines/notes will be made available on Laulima. Expand on these notes as

necessary during class lectures, discussions, and activities. Financial statements, case

studies, excel models and other material will also be provided on Laulima.

Course Goals and Objectives:

• Provide practical financial skills for planning, launching, funding, operating, expanding and selling entrepreneurial/venture businesses.

- Topics covered will include:
 - o Identifying a viable and profitable venture opportunity
 - o Forming the business organization
 - O Developing an efficient financial plan and policies (managing cash and growth)
 - o Raising capital for growth (venture capital, equity, debt, asset-based financing)
 - o Analyzing financial statements and ratios from a new venture perspective
 - o Creating pro-forma financials for a fast growth venture business
 - Valuing and modeling (in excel) a new entrepreneurial company or venture
 - o Developing exit strategies (IPO, private sale)
 - o Analyzing and valuing Intellectual Property/Patents in venture businesses
 - o Creating term sheets for issuance of debt and equity securities
 - o Pitching your venture business to venture capital equity investors
- Course is taught via lecture and interactive, in-class exercises. Students must prepare for and participate in all these activities. Assignments are developed to get students involved and learn from the experience.
- Strong "real-world" focus (i.e. case studies, problem solving, deals, trades, etc.).

Additional:

- Calculators: Bring your business calculator to class each day. The Hewlett Packard 10bII and Texas Instruments BAII Plus are fine for the problems we will cover.
- Excel: An understanding of excel will be necessary for project work. If you need extra help with Excel, stop by during my office hours.

Grading:

The following factors will be used to measure students' progress through the course.

<u>Assignments/Cases:</u> In-class cases, short homework assignments and participation. Assignments will be done in both individual and group formats.

<u>Examinations:</u> There will be 2 tests, a midterm and final, each consisting of a combination of objective (multiple choice) questions, analytical problems, and short written answers. Tests are closed-book/note. A formula sheet will be provided. The final exam is not cumulative.

<u>Excel Projects:</u> There will be computer-based assignments during the semester designed to financially model the concepts and skills discussed in class. The main assignment will involve spreadsheet application, analysis and a written executive summary (600 words maximum). Detailed instructions will be provided in class.

<u>Group Project:</u> Groups (5 students per group) will present a 15-minute (limit) oral presentation. Each group will pitch a new business venture to potential venture capital equity investors. In addition to the oral presentation, requirements include: 1) a written executive summary (800 words maximum), 2) Equity issue term sheet, 3) a hard copy of your presentation materials (e.g. power point slides, excel models, pro-forma financial statements, etc.) and 4) email me an excel file of your valuation model. More detailed instructions will be provided in class.

<u>Class Participation:</u> Students are strongly encouraged to actively participate in class discussions. Note: quality (not just quantity) of participation is important. We will have in-class assignments (case studies and problems) and regularly discuss current events/market trends providing students with various opportunities to participate.

Your course grade will be based on a **reasonable curve** over the total points accumulated on all assignments. The following weights pertain to those assignments:

19%
55%
10%
16%

Course Prerequisites: BUS 314

Attendance Policy:

While attendance is not taken, do your very best to attend because there are NO make-ups for missed in-class assignments without official written excuse. Projects and assignments will be collected in class on the day due. You must have a written medical excuse if absent from a test. Make-up tests are typically essay format.

Schedule of Events:

Below is the **tentative** schedule of events subject to changes depending on progress made during the course. Reading assignments include the Class Lecture Notes, the *Entrepreneurial Finance* (text reading is optional) and additional handouts provided in class. You should read the material <u>prior</u> to class so as to maximize the usefulness of classroom time. I will be asking students questions in class.

Session	Date	Day	Topic	Pre-reading Assignment
1	Jan-15	Wed	Trends, Ideas, Ventures and Viability	Chps 1 & 2 Notes
2	Jan-17	Fri	Trends, Ideas, Ventures and Viability	Chps 1 & 2 Notes
