COURSE DESCRIPTION:

"Financial security is a do-it-yourself project."

Your lifestyle tomorrow will be the result of your management and the choices you make today.

"Savings = Pay yourself FIRST"

This course is designed for two groups of students: those who would like a better understanding of their own personal financial situation and those who are preparing for a career as a financial planner. The course focuses on principles and techniques for handling personal financial decisions, including: personal budgeting, obtaining credit, tax management, risk management, buying a home, buying an automobile, savings and investments, and retirement planning. At the end of the course, the student should be able (a) to prepare his/her own financial plan; (b) to know where to get the best source of information; and (c) to make sound decision on his/her financial problems. This course is designed for two groups of students: those who would like a better understanding of their own personal financial situation and those who are preparing for a career as a financial planner. Throughout the semester, financial planning professionals will be invited to come to speak in the class on their expertise and profession.

FINANCIAL CALCULATOR:

Financial calculators are very different from the scientific calculators that you may be accustomed to using. While the majority of problems can be solved with a scientific calculator, many problems are greatly simplified using a financial calculator. For this reason, I encourage you to invest in a financial calculator for this course. It will be a valuable tool both here and in planning your financial future. The book uses Texas Instrument (TI) Business Analysis II (BA II) Plus as an example.

COURSE FORMAT:

The course is conducted in a lecture format. The lectures will be augmented by individual project analyses. Throughout the semester, outside speakers who work in the field of financial planning will be invited to talk on differing topics.

GRADING POLICY:

The final letter grade will be determined based on the following cut-off: **100: A+; 95-99: A; 90 – 94: A-; 85 - 89: B+; 80-84: B; 75 -79: B-; 70 - 74: C+; 65 – 69: C; 60 - 64: C-; 55-59: D+; 50-54: D; <50: F.** Under normal situation, about 25-30% of students receive A or A- and 40-45% of students receive grades in B range in this class. The final grades may also be dependent upon how well a student performs in relationship to his or her group. The course grade is based on the following course requirements: examinations, projects, and participation and is computed as follows:

1.	Class Participation ¹	30 Points (8%)
2.	Cumulative Final Exam (Friday, December 17, 12 – 2 pm)	100 Points (27%)
3.	Financial Planning Assignments ²	240 Points (65%)
