**Objectives of the Course:** This course has the objective of communicating the essential concepts that finance executives must have to use international financial information for planning, control and decision-making and to formulate financial policy and manage financial resources internationally.

Throughout the course, the professor maintains a global focus and offers a wealth of international examples. The course does not require advanced calculus as a prerequisite. But basic financial and statistical math is required.

The classes will primarily lecture oriented. The text and the combination of class lectures and problem solving achieve the course objective.

**Prerequisites:** Students should first take Business 314 **before** taking this class

**Exam Policy:** Students should bring finance calculators to the exams. Smartphones (I-phones) and laptops are not allowed. Make-up exams will only be given under extreme circumstances, such as injury or illness. For each exam, students can bring in one-page note

prepared in advance (both sides). There will be two midterm exams and a final exam (cumulative) at the end of the semester.

**Grading Policy:** The final grade will be based upon the following formula:

Mid (1 + 2)/2 x 0.6 + Final x 0.4. There is no change in grading standards and plus/minus grades are given.

**Homework Problems:** Homework problems are assigned for each chapter. These are not collected and graded, nor do they count explicitly toward a student's grade. However, it is impossible to master the material in this course without doing the homework problems conscientiously. There will be a high correlation between exam material and homework assigned. ANSWERS to most homework problems will be provided in class.

**Course Attendance Policy:** Your attendance will be taken in each class. If you expect to miss more than ten class meetings, you should consider taking this course another semester. Please get the notes and any handouts for the preceding class from your fellow students. I also do not permit my lectures to be recorded on cellphones. My lectures are protected by copyright and recordings of lectures for onward distribution are strictly prohibited.
